

Water quality potential priorities

- Nitrate well test zone outlines [13]
- Wells (not all are mapped) [2460]
- Septic systems (not all are mapped) [2471]
- ★ IAOWTS [18]
- Lots w wells <100ft of mapped septic [178]
- Lots w residence but no mapped septic [1366]
- Groundwatersheds(USGS_Misut) [0]

Lack of mapped septic implies pre-1970s system. While well and septic location data appears to be circa 2015/16, these properties merit focus. Well and septic location source: MainStreetGIS dataset used in Comprehensive Plan.
